## Smart Cities Project Guide

### **Project setting new baseline for e-service delivery in North Sea region**

Resource provided by [Saya Askarova](#)

10 July 2016 – Almaty, Kazakhstan – A new resource has been added to the PM World Library related to major urban development projects and programmes. The new resource is titled “**Smart Cities Project Guide**”.

The Smart Cities project is creating an innovation network between governments and academic partners in the North Sea Region that is leading to excellence in the development and take-up of e-services and e-government, and which is setting new standards for e-service delivery across the whole North Sea region.

The Smart Cities partnership is made up of thirteen partners from six countries in the North Sea region. All of the government partners are leading cities and regions with considerable experience in developing and delivering e-Government. Project partners want to improve their e-service-delivery by rethinking the basics of service delivery, by changing their innovation methodology, by transferring their best practices to other project partners, and by engaging with academic and research partners from the very beginning of this process.

Smart Cities is partly funded by the Interreg IVB North Sea Region Programme of the European Union. The North Sea Region Programme 2007–2013 works with regional development projects around the North Sea. Promoting transnational cooperation, the Programme aims to make the region a better place to live, work and invest in.

To access this new resource, go to <http://pmworldlibrary.net/major-projects-programmes/>, click on “Urban Development / Redevelopment – Mega-Cities – Smart Cities”, and scroll down to find this resource. Must be a logged-in professional member to access.
