Project Procurement Management: 5 Steps in the Process

Access to project procurement management process guidance added to PM World Library

Resource provided by Andrew Shadrach Osayande

28 December 2016 – Akure, Ondo State, Nigeria – Access to a new resource has been added to the PM World Library related to project procurement management. The new resource is titled "***Project Procurement Management Process***" and is from MyManagementGuide.Com, a popular online resource dedicated to describing and explaining best practices of project management.

Project procurement management is a section of a project implementation plan to determine how 'the ordered products necessary for producing deliverables can be delivered on time and within the allocated budget'. A project procurement management process is a method for establishing relationships between an organization's purchasing department and external suppliers to order, receive, review and approve all the procurement items necessary for project execution.

To access, go to http://pmworldlibrary.net/ppm-applications-and-hot-topics/ click on "Procurement Management" and scroll down to find the resource. Must be registered as a professional member and logged in to access.

For PMWL Post
